

National Crane Series NBT50

Product Guide

Features

- 31,1 m (102 ft) four-section full power boom and optional 39,01 m (128 ft) five-section full power boom
- 45,36 t (50 USt) at 2,44 (8 ft) rating and 49,90 t (55 USt) at 2,44 (8 ft)
- Self-lubricating Easy Glide wear pads
- Hydraulic removable counterweight system
- Outrigger design eliminates need for SFO

Features

National Crane Series NBT50

- 45,36 t (50 USt) maximum capacity
- 41,1 m (135 ft) maximum tip height (main boom)
- 54,6 m (179 ft) maximum tip height (boom with extension)

National Crane Series NBT55

- 49,90 t (55 USt) maximum capacity
- 41,1 m (135 ft) maximum tip height (main boom)
- 54,6 m (179 ft) maximum tip height (boom with extension)

Deluxe operator's cab

The Series NBT50 operator's cab includes all-steel construction with acoustical lining and tinted glass throughout, air conditioning, deluxe seat with arm rest mounted single-axis electric controllers, windshield and sliding skylight with electric wipers, diesel heater with defroster, circulating fan, fire extinguisher, and dual cab mounted work lights.

Counterweight

Two-piece 1360,8 kg (3000 lb) each (total 2721,6 kg [6000 lb]) hydraulically removable counterweight slabs. Removable counterweight slabs can be stowed on front outrigger box for roading.

Outriggers

Equipped with left, right ground level and in-cab outrigger controls. The Series NBT50 outriggers allow quick and easy crane set-up and includes a new outrigger beam position sensing system that aids the operator in selecting the right load chart based on the crane's outrigger footprint. The front outrigger box has an X-shaped footprint that eliminates the need for a single front outrigger.

Dimensions:

Full span:

Front: 7,09 m (23 ft 3 in) Rear: 7,39 m (24 ft 3 in)

Mid span:

Front: 4,72 m (15 ft 6 in) Rear: 4,90 m (16 ft 1 in)

Retracted-front and rear: 2,39 m (7 ft 10 in)

Four or five-section boom

A four-section 31,1 m (102 ft) boom comes standard and can be equipped with a 7,9 m (26 ft) or a 13,7 m (45 ft extension). The NBT50 Series also offers a five-section (39,01 m) 128 ft optional boom which can be equipped with either a 7,9 m (26 ft) or a 13,7 m (45 ft) extension for additional lifting versatility.

Features

National Crane is proud to introduce the Series NBT50 crane

The Series NBT50 represents the pinnacle of machine performance, combining the latest in both hydraulic and electronic machine control. This new product provides premium operator comfort with the latest Manitowoc cab design, simplified machine setup with no need for an SFO and front bumper control of the hoist(s).

- The 3rd wrap and last level indicators will alert operators when the last of the wire rope is being used and the cable follower will keep constant tension on the rope reducing the potential for bundling.
- Speedy-reeve boom tip and sheave blocks simplify rigging changes by decreasing the time needed to change line reeving.
- Easy Glide boom wear pads reduce the conditions that cause boom chatter and vibration. The net result is smoother crane operation.
- Pressure compensated, load sensing hydraulic system
 - PTO mounted axial piston pump
 - Superstructure mounted reservoir with integral suction valve/filter, return filter, sight gauge, and temperature gauge
 - Oil cooler with 406 mm (16 in) fan and temperature sensor
 - Pressure transducers integral to the lift cylinder holding valve.
- LMI system features a 178 mm
 (7 in) graphical, color display.

 Real-time crane information is displayed with numerous operator features such as soft metric load chart conversion, hydraulic filter change reminders and an electronic hour meter. LMI system also displays key truck diagnostics such as fuel level, coolant temperature and DPF status.
- The display console allows each crane control function to be set independently to reduce speed (100%, 75%, 50%, and 30%).
- Dual axis controls are optional for superior operator control, along with standard air conditioning, a diesel heater and ergonomic seats.

Specifications

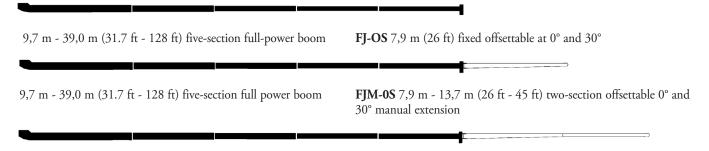

Boom and extension combinations data

NBT50 Series Available in two basic models:

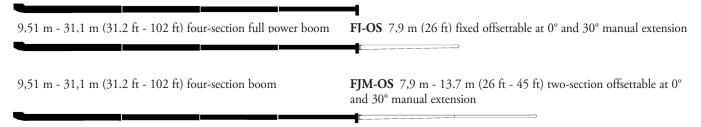

NBT50-102: Equipped with a 9,51 m - 31,1 m (31.2 ft - 102 ft) four-section boom. This model can be equipped with an optional 7,9 m (26 ft) fixed offsettable extension, offering a maximum tip height of 41,1 m (135 ft) and a 7,9 m - 13,7 m (26 ft- 45 ft) extension, providing a maximum tip height of 46,9 m (154 ft).

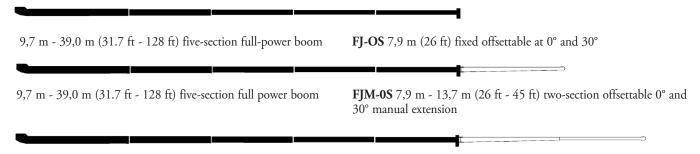

NBT50-128: Equipped with a 9,7 m - 39,0 m (31.7 ft - 128 ft) five-section boom. This model can be equipped with an optional 7,9 m (26 ft) fixed offsettable extension offering a maximum tip height of 48,9 m (161.0 ft) and a 7,9 m - 13,7 m (26 ft - 45 ft) two-section offsettable extension, providing a maximum tip height of 54,6 m (179 ft)

NBT55 - 102: Equipped with a 9,51 m - 31,1 m (31.2 ft - 102 ft) four-section boom. This model can be equipped with an optional 7,9 m (26 ft) fixed offsettable extension, offering a maximum tip height of 41,1 m (135 ft) and a 7,9 m - 13,7 m (26 ft- 45 ft) extension, providing a maximum tip height of 46.9 m (154 ft).

NBT55-128: Equipped with a 9,7 m - 39,0 m (31.7 ft - 128 ft) five-section boom. This model can be equipped with an optional 7,9 m (26 ft) fixed offsettable extension offering a maximum tip height of 48,9 m (161.0 ft) and a 7,9 m - 13,7 m (26 ft - 45 ft) two-section offsettable extension, providing a maximum tip height of 54,6 m (179 ft)

Note: Maximum tip is measured with outriggers/stabilizers fully extended.

Specifications

NBT50 Series provisional winch data

- All winch pulls and speeds are shown on the fourth laver
- layer.
 Winch line pulls would increase on the first, second, and third layers.
- Winch line speed would decrease on the first, second, and third layers.
- Winch line pulls may be limited by the winch capacity or the ANSI 5 to 1 cable safety factor.

Weight and CG Estimate Notes:

- 1. Information provided is for reference only.
- 2. Weight and CG data is applicable for a standard machine:

102 ft or 128 ft boom

2/3 part lineblock included

Main hoist only (auxiliary hoist IPO CWT present)

STD decking with fixed access ladder

No extension equipped

No optional turret access step

No auxiliary nose or optional hook blocks.

3. All counterweight configurations are shown in table

Pinned = attached to cylinders and turret (in use)

Stowed = attached to torsion box (not in use)

"2" = Top and bottom slab(s)

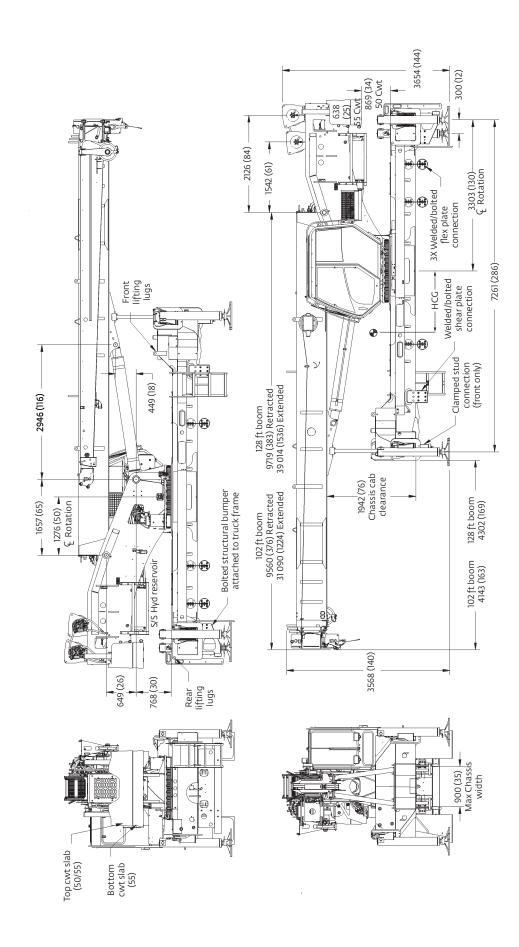

"1" =Top or bottom slab only

"0" = No slab pinned and/or stowed

If both stowed and pinned colums are "0" the counterweight is physically removed from the machine. IPO counterweight is also assumed removed in this case (if no auxiliary hoist is equipped).

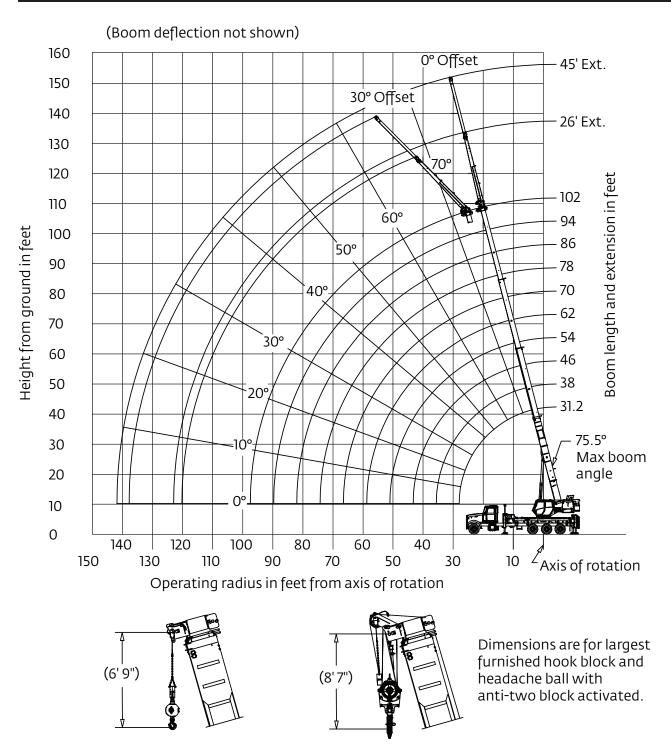

For more information about mounting configuration options, please contact the factory or your local National Crane dealer.

#LMI operating code. Refer to LMI manual for instructions. ***26 ft capacities are applicable to both 26' fixed and 26' tele extension.

Boom extension capacity notes:

- 1. All capacities above the bold line are based on structural strength limitations.
- 2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
- 3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

Warning: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.

- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- Capacities listed are with outriggers properly extended and vertical jacks set only.

NBT50/55-102: Extension information, over rear, outriggers fully extended, no counterweight

80025504B

#LMI operating code. Refer to LMI manual for instructions ***26 ft capacities are applicable to both 26' fixed and 26' tele extension.

Boom extension capacity notes:

- 1. All capacities above the bold line are based on structural strength limitations.
- 2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
- 3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

Warning: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.

- Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.

NOTE: () Boom angles are in degrees.

80034071

Boom extension capacity notes:

- 1. All capacities above the bold line are based on structural strength limitations.
- 2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
- 3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

Warning: Operation of this machine with heavier loads than the capacities listed is strictly prohibited. Machine tipping with boom extension occurs rapidly and without advance warning.

- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- Capacities listed are with outriggers properly extended and vertical jacks set only.

[#]LMI operating code. Refer to LMI manual for instructions.

^{*}Loads are structurally limited.

^{**26} ft capacities are applicable to both 26' fixed and 26' tele extension.

NOTE: () Boom angles are in degrees.

80034967

#LMI operating code. Refer to LMI manual for instructions. **26 ft ca pacities are applicable to both 26' fixed and 26' tele extension.

Boom extension capacity notes:

- 1. All capacities above the bold line are based on structural strength limitations.
- 2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
- 3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.

| Max. boom length at 0° boom angle (no load) | 64 | ft | 64 ft | | | |

NOTE: () Boom angles are in degrees.

80034857A

Boom extension capacity notes:

- 1. All capacities above the bold line are based on structural strength limitations.
- 2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
- 3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.

[#]LMI operating code. Refer to LMI manual for instructions. **26 ft capacities are applicable to both 26' fixed and 26' tele extension.

| Min. boom angle for indicated length (no load) | 29° | 30° | 30° | 31° |
| Max. boom length at 0° boom angle (no load) | 64 ft | | 64 ft | |

NOTE: () Boom angles are in degrees.

80034336

Boom extension capacity notes:

- 1. All capacities above the bold line are based on structural strength limitations.
- 2. 26 ft and 45 ft extension lengths may be used for single line lifting service.
- 3. Radii listed are for a fully extended boom with the boom extension erected. For main boom lengths less than fully extended, the rated loads are determined by boom angle. Use only the column which corresponds to the boom extension length and offset for which the machine is configured. For boom angles not shown, use the rating of the next lower boom angle.

- 4. Boom angle is the angle above or below horizontal of the longitudinal axis of the boom base section after lifting rated load.
- 5. Capacities listed are with outriggers properly extended and vertical jacks set only.

[#]LMI operating code. Refer to LMI manual for instructions. *Loads are structurally limited.

^{**26} ft capacities are applicable to both 26' fixed and 26' tele extension.

Accessories

Radio Remote Controls – • NB6R

Eliminate the handling and maintenance concerns that accompany cabled remotes. Operate to a range of about 76 m (250 ft), varying with conditions. Remote transmitter displays LMI information on LCD screen.

Personnel Baskets -

One and two person baskets, gravity hung with swing lock and full body
harness. Fast attachment and secure locking systems. Ratings from 181 kg
(400 lb) to 544 kg (1200 lb)

• BSAY-1
• BSAY-2

Auxiliary Winch -

Second winch redundant to the main, 15,000 lb gear set, two-speed piston motor, cable packer, grooved drum, DRI/LLI standard with 5/8 in Dyform 34LR wire rope

Spanish-Language Danger Decals,
Control Knobs, and Operators' Manuals

• SDD
• SOM

Rotation Bearing Lock •MRL

Manual applied lock on rotation bearing (360° positioning)

Metric Capacity Charts •MCC

Dual-Axis Electronic Joysticks •DAJS

In place of single-axis joysticks

Special Paint •SPECIAL PAINT

One color in lieu of standard paint color-non metallic
